## National Fossil Day: Fossils of Mammoth Importance

**SATURDAY, OCTOBER 14**

**11:00 AM–2:00 PM**

**In Broder Hall**

Join Dr. Jonathan Hoffman, Earth Science Collection Manager, to explore what fossils can tell us about past climate, sea level, ecology, vegetation, and more. Look through microscopes to compare pygmy and Columbian mammoth diets, learn about trace fossils, explore the island effect, and discover why Santa Barbara is so geologically unique compared to other parts of California. Plus, kid-friendly activities including: mineral replacement demonstrations, create your own mock fossil casts and more!

FREE with paid admission.
