

DINO DAYS

Dig deeper into a dinosaur's world with hands-on activities for all ages.

At the Courtyard // 11:00 AM–2:00 PM // Included with Museum admission

Saturday, May 25 // Paleobiologist Grayson Kent

Get up close and personal with a selection of theropod fossils, including teeth, talons, eggs, and even some specimens from modern-day dinosaurs!

Wednesday, June 5 // Paleontologist Jenna Rolle

Sure, many dinosaurs were big, but just how big? Come see how you stack up to these colossal creatures and explore fascinating fossils hands-on.

Saturday, June 22 // Paleopathologist Howell Thomas

Investigate the lives of ancient and modern marine mammals by looking at the bones they left behind.

Saturday, July 6 // Paleobiologist Grayson Kent

Explore the adaptations of herbivorous dinosaurs. Examine horns, armor, and even some dino dung!

Wednesday, July 17 // UCSB Paleontologist Daniel Luna, Ph.D.

Examine many beautiful and fascinating specimens, including 13,000-year-old teeth and claws from the La Brea Tar Pits, 400-million-year-old trilobites, and a flying dinosaur!

Wednesday, July 31 // Dibblee Collection Manager of Earth Science Jonathan Hoffman, Ph.D.

Discover what kinds of fossils are local to our area—including some magnificent mammals—and learn how to recognize them as you get a sneak peak of some of the marvels in our fossil collection.

Saturday, August 10 // Astronomy Programs Presenter Charlotte Zeamer

Learn about the cosmic catastrophe that ended the reign of reptiles and paved the way for the Age of Mammals: the asteroid that caused the dinosaurs' extinction.

Saturday, August 17 // Western Science Center Curator Andrew McDonald, Ph.D.

Discover the dinosaurs of New Mexico's Late Cretaceous—including newly-discovered *Invictarx* and *Dynamoterror*—with the WSC's mobile fossil unit full of fascinating replicas from a bygone world.
